Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: locking element 20 (page 2, line 3) and co-moving hole 111 (page 4, line 17). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: in the Abstract, line 4, delete "to"; on page 1, line 10, delete "to"; page 2, note that as recited in line 3, the element "20" is not labeled in the drawings; line 4, change "has" to —have—; and lines 5 and 23, delete "to"; page 4, line 17, the element "111" is not labeled in the drawings.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3676

In claim 1, lines 20, 26,28, it appears that "inner locking element" should be changed to –outer locking element--; furthermore, in line 20-21, "the fixing base" lacks antecedent basis and should be changed to –a fixing base--. Note that claim 2 is included herein merely because of its dependency.

Allowable Subject Matter

4. Claims 1 and 2 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

The prior art of record fails to teach all of the lock bases, fixing plates, fixing posts, locating posts, connecting posts, first holes, second and third holes to receive the various corresponding posts and screws as claimed and further including the gap tail locating post on the outer lock base to receive the third screw. While the cited patents to Schlage '172, Katayama '936 and Wang '126 teach various assemblies comprising posts and hidden screws, they do not teach having all of the fixing plates and lock bases as claimed. Furthermore, while the cited patents to Crepinsek '023, '979, Welch '571, Char et al '355, Huang '123, Widen '619 all teach lock mounting assemblies having third screws engaging a part of the lock assembly from the edge of the door, they do not provide motivation for including such a feature on any of the lock assemblies of the aforementioned patents. In addition, there would have been no motivation to provide gap tailed post structure on the fixing plates or lock bases of the aforementioned patents in order to provide the third screw assembly as taught by

Crepinsek and the others. Accordingly, claims 1 and 2 define over the prior art of record.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Especially note the cited patents mentioned above.
